

Question: Which groups' rates of upward mobility were significantly affected by the Great Migration?

- a) Low income black men
- b) High income black men
- c) Low income black women
- d) High income black women
- e) Both a and b

Answer: e – The great migration significantly affected the mobility outcomes for both low and high income black men, but didn't have a significant impact for black women. This information comes from the following slide in the presentation.

Whose upward mobility was affected by Great Migration?
